

## Neo Cloud Storage

### Efficient and Compliant Archiving

Many companies are transitioning from on-premise PBX systems to cloud UC services. But what happens to existing recordings? With Neo Cloud Storage, you can securely and legally archive your recordings in the cloud – without additional investment in hardware.

### Easy Access and Flexibility

- ✓ Access anytime and from anywhere.
- ✓ Secure local download of recordings.
- ✓ Flexible subscription models.
- ✓ Highest security and compliance standards.

## How it works

# Neo Cloud Storage

Your records are stored securely and efficiently in the cloud - with the highest compliance standards.

### Import of Recordings

Your data is uploaded to Neo Cloud and securely stored.

### Secure Access

The Neo Web Client allows you to retrieve data anytime.

### High Availability

Data is replicated six times across two geo-redundant Azure data centers.

### Flexible Data Management

If needed, the Neo Download Client enables secure local storage.

# Secure and Compliant Storage

Your records are stored securely and efficiently in the cloud - with the highest compliance standards.

- ✓ **Microsoft Azure Blob Storage** with **geo-redundancy** for maximum reliability.
- ✓ **replicated six times** across two geo-redundant Azure data centers.
- ✓ **AES-256 encryption** and **multi-level access control** for maximum data security.
- ✓ **Microsoft Enterprise Cloud** certified according to ISO/IEC 27001 and ISO/IEC 27018.
- ✓ Data processed exclusively within the **European Economic Area (EEA)**.
- ✓ ASC certified according to ISO **9001**, **14001** and **27001**.

## ASC Technologies

ASC is a global leader in compliance recording, quality management and AI-based analytics. Our solutions help organizations evaluate their communications-based data, securely meet regulatory requirements, and optimize customer service. Using AI, conversations are analyzed in real-time to detect compliance violations and assess the quality of customer interactions. Financial services, contact center, and public safety organizations rely on ASC to ensure their communication is legally compliant and customer-centric. Our solutions are scalable and flexible - available as cloud services, on-premise, or in hybrid environments. Headquartered in Germany, with subsidiaries in 15 locations and a global partner network in over 60 countries, ASC is the #1 in Europe and sets standards for AI-based communication technology worldwide.
